16-channel telemetry system including signal conditioning for strain gage, thermo couples, Pt100, ICP, POT and high-level inputs

INSTRUCTIONS FOR QUALIFIED PERSONNEL ONLY!

General functions:

The CT16 Compact is a 16-channel telemetry system with integrated signal conditioning for sensors, wireless digital transmission and analog reproduction. The conditioned measured values are routed via anti-aliasing filter to a 12-bit A/D converter, simulate sampling of all channels, encoded in PCM format and transferred to the HF transmitter as modulation variables. Dynamic range is 72dB with a signal-to-noise ratio of approximately 70dB. Different carrier frequencies available with the Various configurations of different sensor modules are possible like signal conditioning for strain gages (STG), thermocouples type K (Th-K), thermo sensors Pt100, ICP sensors, potentiometer sensors (POT) and also Voltage inputs (+/-5 or +/-10V). Mixed configuration available.

Specify CT-xx modules at order!!
