PRESS RELEASE - For Immediate Release

Joining the BDSV: imc Test & Measurement Strengthens Its Role as a Technology Partner to the Defense Industry

Berlin (Germany), May 7, 2026 - The Berlin-based measurement system manufacturer and solutions provider imc Test & Measurement joined the Federal Association of the German Security and Defense Industry (BDSV) on April 1, 2026. The BDSV represents the interests of the German security and defense industry with the aim of strengthening its competitiveness and future viability and promoting dialogue with policymakers, institutions, the media, and society.

With its BDSV membership, imc underscores its network within the German security and defense industry and contributes its many years of expertise in the development, testing, and validation of complex systems with integrated measurement and test solutions.

With comprehensive expertise in sensor integration, test bench control, and automated, AI-supported evaluation and documentation, imc develops customer-specific turnkey solutions and, together with its sister company GRAS Sound & Vibration, successfully implements acoustic measurement solutions for modern defense technology.

As a long-established German SME, imc has more than 30 years of experience in demanding applications within the defense industry. During this time, imc has successfully implemented numerous complex customer projects in the fields of armored vehicles, helicopters, avionics, and defense system testing. As a result, the company has established itself as a reliable defense partner for leading companies and system integrators in the security and defense industry.

By joining the BDSV, imc Test & Measurement reaffirms its commitment to contributing, as a technology partner, to the performance, innovative strength, and future viability of the German security and defense industry.
